

**SOMATIC CELLS WITH ABLATED PrP GENE
AND METHODS OF USE**

ABSTRACT OF THE DISCLOSURE

5 The present invention comprises a method for producing mammalian therapeutics free
from prion contamination and cells for use in such methods. Such therapeutics are produced
in somatic cells having a genome with an artificially altered PrP gene. The PrP gene in these
cells may be ablated, or replaced by an exogenous inducible form of the PrP gene. The
endogenous gene in the host cells may be disrupted, or disrupted and replaced by an
10 exogenous PrP gene.
